Electronic Lock CA-EL280-5

Product Introduction

Electromagnetic lock with 280kg (600lbs) holding force with sensor and led for glass, wood, fireproof, sliding or metal doors. Ideal for exterior doors due to its low maintenance.

Parameter for CA-EL280-5

1. Collinear Load Test 280kg / 600pounds.
2. Dual Voltage 12 or 24 VDC(optional).
3. The Standad Voltage is 12VDC when Finished.
4. MOV Provides Reverse Current Protection.
5. Anti-Residual Magneism Designed.
6. High Strength Material,Anodized Aluminum Housing.
7. Design with no Mechanical Bolt.
8. Increase the holding Force,Dual Insulative Hosing.

- Fails Safe (Normal Open)
 - Lock dimensions: 250L * 48W * 26H mm
 - Platen measurements: 180L * 38W * 11H mm
 - Stage with anti residual magnetism system
 - Holding Force: 280Kg (600Lbs)
 - Status sensor
 - Two-color signaling LED
 - Consumption: 400mA @ 12Vcc
 - Weight: 1.2KG
-
